

AFTER EOS, DYEMANSION EXPANDS PARTNER NETWORK AND APPOINTS FIRST AUTHORIZED HP MULTI JET FUSION RESELLER

DyeMansion, global leader of additive manufacturing finishing systems appoints Matsuura Machinery Ltd. as first authorized reseller of HP Multi Jet Fusion and DyeMansion technology.

Roger Howings, Managing Director, Matsuura & Greg Gracki, Partner Manager, DyeMansion

14.12.18 Munich - With Matsuura Machinery Ltd. DyeMansion recently expanded their partner network to allow customers evaluating and sourcing their complete AM process chain from one solution provider.

DyeMansion press release, 14.12.18

Matsuura is the first authorized reseller of both - HP Multi Jet Fusion 3D-printers and DyeMansion finishing systems in the UK.

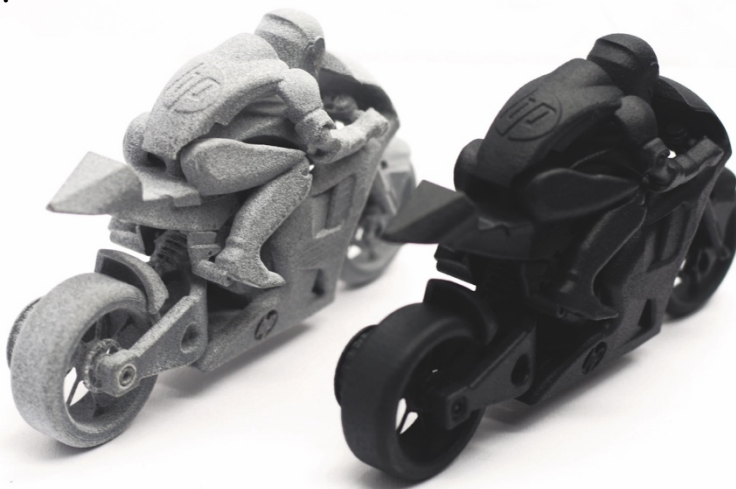

“Our association with DyeMansion completes our technical offer to the UK market in 3D printing - any shape, any size and now any color, making us the one stop applications and products specialist for companies investing in UK plastics additive manufacturing.”, comments Roger Howkins, Managing Director at Matsuura Machinery Ltd.

From now on, all customers in the UK that consider manufacturing with 3D-printing technologies have the possibility to get consulting, testing and benchmarking services from Matsuura in Leicestershire. The showroom that was already equipped with the HP 4200 machine along with the processing station, will now be completed with the three-stage DyeMansion Print-to-Product workflow, consisting of the systems DyeMansion Powershot C, DyeMansion Powershot S and DyeMansion DM60.

FINISHING SOLUTIONS FOR HIGH-VALUE & HIGH-VOLUME AM APPLICATIONS

DyeMansion technology starts where the industrial 3D-printer stops and delivers an automated end-to-end finishing solutions for high-volume AM applications of high-value. Starting with a damage-preventive part cleaning solution that takes around 10 minutes, the risk of burns or scratches is excluded and the part perfectly prepared for further finishing steps. Step two is about surfacing.

PolyShot Surfacing (PSS) technology delivers a homogeneous surface quality, transforming rough, sensitive print into long-lasting, scratch resistant finished products.

DyeMansion press release, 14.12.18

The third step is the coloring- with over 170 RAL colors available and the ability to customize colors to achieve corporate colors. The completely automated, safe and repeatable process is a last step in order to get the high-value finished part.

“We are glad to announce our partnership with Matsuura and welcome the team. Supplying them not only with our technology, but also with the appropriate training and consulting knowledge, we are sure that the partnership will be beneficial for all three sides, Matsuura, DyeMansion and above all, for the existing and future customers.”, says Greg Gracki, Sales Partner Manager at DyeMansion.

DyeMansion is expanding their business and is currently looking for partners that would like to represent their leading Print to Product finishing technology. Please contact Greg Gracki, Sales Partner Manager at DyeMansion for further details.

ABOUT DYEMANSION

The Munich-based company was founded in 2015 and offers a variety of high-volume finishing systems for an easy 'Print-to-Product' workflow that transforms raw, 3D-printed parts into high-value consumer and industrial products. With the ability to provide precision coloring and finish to the most exact specifications, DyeMansion technology is already trusted by more than four-hundred customers, including leading global manufacturers in diverse industries, such as eyewear, automotive, retail, medical, and sports equipment. That's why DyeMansion has quickly established itself as the global leader in additive manufacturing finishing systems. DyeMansion technologies complement all major industrial, powder-based 3D printing systems, including EOS, HP, 3D Systems and Prodways and delivers high-volume production for anything from luxury sunglasses to mission-critical automotive parts.

ABOUT MATSUURA MACHINERY LTD

Matsuura is focused on maximising your competitive advantage. Providing OEM's, SME's and sub-contractors the best additive and subtractive machining solutions, innovative engineers and optimized manufacturing processes. Backed by world class customer support and outstanding multi-skilled engineers. Matsuura UK is an authorized reseller of HP Multi-Jet Fusion 3D Printers.
