

SOLIDPRO INVESTS IN DYEMANSION POST-PROCESSING SYSTEMS FOR 3D-PRINTED PRODUCTS

- Partnership with DyeMansion - the world leading provider of AM finishing systems
- Portfolio of the complete Additive Manufacturing value chain
- New & innovative possibilities for Solidpro customers
- Goal for the future: Post-processing democenter in Langenau

LTR: Werner Meiser (Managing Director, Solidpro), Greg Gracki (Global Sales Channel Manager, DyeMansion), Kai Witter (COO, DyeMansion), Maximilian Kraus (Sales & Business Development EMEA, DyeMansion), Steffen Hägele (Sales - Team Leader 3D Printing, Solidpro), Valentin Kurtovic (Assistant to the Management, Solidpro), August Kurz (Sales - Overall Sales Management, Solidpro), Christoph Kummer (Technology - Head of Manufacturing Solutions, Solidpro), Felix Ewald (CEO & co-founder, DyeMansion)

Munich, 12 March 2020 - Solidpro is starting into 2020 with a new partner: Together with DyeMansion, the HP Gold Partner gains the world's leading provider of finishing systems for industrial 3D-printing and an expertise in post-processing. This means that customers and interested parties can now be served with the complete Additive Manufacturing value chain.

For DyeMansion, it all began with color experiments in their basement, which led to the development of the world's first coloring system for 3D-printed plastics in 2015. Today the company is the global leader in industrial post-processing solutions. From perfect fit eyewear to personalized car interiors, the technology of the Munich-based company makes 3D-printed products a part of our everyday life.

Today, the start-up's portfolio includes cleaning, surfacing and coloring solutions for a wide range of industrial 3D-printing technologies in the plastics sector and is now also available through Solidpro. The Bechtle subsidiary thus completes the AM value chain for their customers and interested parties, not only for HP Multi Jet Fusion technology, but also for a wide range of 3D-printing solutions in the plastics sector.

Steffen Hägele, Team Leader 3D-Printing at Solidpro, is looking forward to the joint cooperation: "We are pleased to have found a strong partner in DyeMansion, who understands the market requirements in the field of post-processing and provides the appropriate solutions and continuously develops them further. The DyeMansion products harmonize perfectly with the HP Multi Jet Fusion technology and support our customers on their path to automated, professional Additive Manufacturing".

As usual Solidpro is not only a sales partner, but also offers companies an all-round service from consulting and the production of benchmarks to support for the best possible customer product.

DyeMansion also appreciates this, as Kai Witter, Chief Customer Officer at DyeMansion, confirms: "Solidpro is one of the most well-known and successful HP partners worldwide and enjoys an excellent reputation with customers. We are very pleased about the new partnership. Germany is our home market and therefore of particular importance to us. By completing the AM value chain with the DyeMansion

Print-to-Product platform, Solidpro offers the right portfolio and know-how that users need when implementing their applications in 3D-printing. Namely an answer to the question: "How do I get from my idea to the finished series product?"

LTR: Kai Witter (COO, DyeMansion), Johannes Mayer (Account Manager 3D Printing, Solidpro), Maximilian Kraus (Sales & Business Development EMEA, DyeMansion), Sebastian Weber (Account Manager 3D Printing, Solidpro) together at the AM Forum in Berlin

A first joint appearance of the two companies already took place at the AMForum in Berlin from March 11 to 12, 2020. In addition, a post-processing democenter in the Solidpro headquarters in Langenau is currently being planned. Here, interested parties will have the opportunity to experience the DyeMansion portfolio live and ask questions directly to the 3D printing experts at Solidpro.

ABOUT SOLIDPRO

Since 1997, Solidpro GmbH, based in Langenau, Baden-Württemberg, has been supporting its customers' complete value chain, from development to visualization and production. From the industry-specific software solutions SOLIDWORKS, SolidCAM and CAMWorks to special workstations for users and professional 3D printing from HP Inc. and Desktop Metal Inc. as well as customized services and seminars, Solidpro, with a total of 12 locations throughout Germany, does everything to achieve added value for customers and partners. As a successful company, Solidpro benefits on the one hand from the flexibility of a medium-sized company, and on the other hand, as a member of the Bechtle Group, it is equipped with a strong group in the background.

ABOUT DYEMANSION

DyeMansion is the global leader in Additive Manufacturing finishing systems that turn 3D-printed raw parts into high-value products. From perfect fit eyewear to personalized car interiors, our technology makes 3D-printed products become a part of our everyday life. Starting in 2015 with the first industrial coloring solution for powder bed fusion parts, we extended our portfolio with advanced part cleaning and surfacing solutions for a wider range of 3D-printing technologies in the field of plastics. Today, our Print-to-Product workflow combines industry-leading hardware with the widest range of color options on the market. Our Industry 4.0 ready systems can be integrated seamlessly into your production. The ability to provide a flexible solution for both small batches and high volumes makes us a trusted partner for your future factories. Through close collaboration with our customers across all industries, our technology and expertise continuously grow with the market. Reduced cost per part, unmatched quality, and high sustainability are core values that drive each and every innovation we develop. In addition to these principles, finding the right finish for every application is what drives us.
