

DYEMANSION LAUNCHES LARGEST INDUSTRIAL POST-PROCESSING PLATFORM FOR ADDITIVE MANUFACTURING WORLDWIDE

The platform includes 46 strong alliances with one common goal: Transforming the manufacturing industry together. Enabling high-value products through industrial 3D-printing and world-leading post-processing solutions.

13.07.2020 (Munich) - The new platform brings together production and sales partners offering industrial post-processing of 3D-printed polymer parts to users of Additive Manufacturing worldwide. The close exchange within this network delivers added value for all parties involved and ensures a global availability of DyeMansion's solutions. Now the network is accessible online for all AM users with transparent filter functions and profiles of every partner involved. This makes finding the right partners and the perfect finish easier.

"Alliances are the basis to transform the manufacturing industry together. Those and the final touch that our solutions provide are key drivers to produce high-value

products at scale. We are proud to have built such a strong platform with partners worldwide, offering DyeMansion technology and sharing the same vision”, says Kai Witter, Chief Customer Officer at DyeMansion.

PRODUCTION PARTNERS

MANUFACTURING HIGH-VALUE PRODUCTS AT SCALE

All listed production partners are capable to produce high-value products at scale in DyeMansion quality. They play a key role in transforming the manufacturing industry and serve small and medium-sized customers to large corporate accounts in various industries from Automotive, Aerospace to Healthcare or Consumer.

Oscar Klassen, CEO & Co Founder at JawsTec: “With a partnership between DyeMansion and JawsTec, we will be able to provide our customers with the highest quality 3D printed parts after post-processing on the market for a cost effective price. Making it easier to access for small and large businesses in developing and production line products in the manufacturing industry. 3D printing provides flexibility with instant production and will be the way of future manufacturing because of its ability to make changes to the parts and finishes that are now achievable with the DyeMansion solutions.”

MOST RECENT ALLIANCES WITH PRODUCTION PARTNERS

Akhani 3D, South Africa

Akhani 3D offers a comprehensive AM production service with a full Print-to-Product workflow, from design and optimization to SLS metal & polymer 3D-printing to finishing. For more information, visit: www.akhani3d.com

JawsTec, United States

From small businesses to large production services: We enjoy working with customers on their 3D-print projects and assure that they get service & quality that exceeds their expectations. For more information, visit: <https://www.jawstec.com/>

Solaxis, Canada

Solaxis specializes in high-quality industrial 3D printing with advanced thermoplastics, for end-use production parts, functional prototypes and specialized tooling. For more information, visit: <https://solaxis.ca/en/>

Prototal, Sweden

The combined production capacity at Damvig and Prototal offers the market a wide range of industrial 3D printers within the SLA, SLS and MJF technologies. For more information, visit: <http://www.prototal.se/en>

Mophene 3D, China

As a world leader in flexible polymer SLS 3D printing, Mophene3D provides materials solution, 3D model building, and post-treatment service of printed articles. For more information, visit: www.mophene3d.com

A full overview of production partners can be found here:

SALES PARTNERS

GLOBAL AVAILABILITY OF POST-PROCESSING EQUIPMENT & CONSULTING AROUND THE COMPLETE AM PROCESS CHAIN

DyeMansion's new partner model offers different levels - from a flexible entry version up to a Platinum status, which includes an entire end-to-end post-processing workflow onsite. Detailed information can be requested through DyeMansion directly.

Hargurdeep Singh, VP of Additive Manufacturing at CAD MicroSolutions: "The DyeMansion Print-to-Product workflow is a perfect complement to HP Multi Jet Fusion technology and enables us to offer our customers a complete solution for the 3D-printing process chain. We're particularly excited that DyeMansion technology will give our customers in the Automotive industry the ability to overcome the strict color requirements of 3D-printed parts for automotive interiors."

MOST RECENT ALLIANCES WITH SALES PARTNERS

AMKOREA, Korea

AMKOREA is a distributor of 3D printers and post-processing systems in Korea selling MJF (HP), SLA (Uniontech), SLS (ASPECT) systems, and DyeMansion technology. For more information, visit:

www.amkorea21.com

CAD MicroSolutions, Canada

CAD MicroSolutions is a leading service partner and distributor of 3D technology to address the entire product development lifecycle in Canada. For more information, visit: www.cadmicro.com

Centrum Druku, Poland

A national expert in the field of printing for business and image processing, powered by over 20 years of experience with quality confirmed by ISO standards. For more information, visit: www.DyeMansion3D.pl/en/

Cimquest, United States

Cimquest is an industry-leading provider for advanced manufacturing products, including 3D Printing, CNC Programming, and 3D Scanning. For more information, visit: www.cimquest-inc.com

druckerfachmann.de, Germany

Since 1998, druckerfachmann.de have been serving medium-sized businesses in Germany. druckerfachmann.de is an expert when it comes to Print-to-Product around the HP 3D-printing solutions. For more information, visit: www.additive-fertigung-berlin.de

Global3D, Australia

Global3D Pty Ltd has its head office in Perth, Western Australia and caters to all states of Australia as well as New Zealand. Global3D is a 3D-printing and design hub, selling automated post-processing systems that are second to none - DyeMansion. For more information, visit: www.global3d.com.au

3D Maquinser, Spain & Portugal

3D Maquinser offers consulting & implementation of solutions for additive manufacturing and a complete integration of plastic & metal products in the production lines on the Iberian market. For more information, visit: www.3dmaquinser.com

MasterGraphics, United States

MasterGraphics' mission is to provide the most advanced technology to their clients ensuring they have best-in-class processes, leveraging both 2D and 3D-printing. For more information, visit: www.mastergraphics.com

Rapid 3D, South Africa

Rapid 3D is shaping the future of industrial 3D-printing & Additive Manufacturing in sub-Saharan Africa and is a technology partner for proven vendors such as EOS and DyeMansion. For more information, visit: www.rapid3d.co.za

Shree Rapid Technologies, India

Incorporated in 1997, Shree Rapid Technologies is one of the largest and the only provider of Additive Manufacturing workflows in India with offerings ranging from design through print to post-processing. For more information, visit: www.shreerapid.com

Techsoft, Austria

Techsoft provides superior solutions for the design and manufacturing industries and supports the complete product development process including Additive Manufacturing with HP MJF and the DyeMansion post-processing systems. For more information, visit: www.techsoft.at

ABOUT DYEMANSION

DyeMansion is the global leader in Additive Manufacturing finishing systems that turn 3D-printed raw parts into high-value products. From perfect fit eyewear to personalized car interiors, our technology makes 3D-printed products become a part of our everyday life. Starting in 2015 with the first industrial coloring solution for powder bed fusion parts, we extended our portfolio with advanced part cleaning and surfacing solutions for a wider range of 3D-printing technologies in the field of plastics. Today, our Print-to-Product workflow combines industry-leading hardware with the widest range of color options on the market. Our Industry 4.0 ready systems can be integrated seamlessly into your production. The ability to provide a flexible solution for both small batches and high volumes makes us a trusted partner for your future factories. Through close collaboration with our customers across all industries, our technology and expertise continuously grow with the market. Reduced cost per part, unmatched quality, and high sustainability are core values that drive each and every innovation we develop. In addition to these principles, finding the right finish for every application is what drives us.
