

DYEMANSION ANNOUNCES THE EXPANSION OF THEIR POWERSHOT PRODUCT PORTFOLIO

On March 24, the post-processing pioneers will introduce the totally new Powershot Performance series alongside a new generation of their classic Powershot C & S models. The Powershot Performance series is designed for users of industrial Additive Manufacturing targeting serial applications. It will be rolled out with selected pilot customers.

March 1, 2021 (MUNICH) - The expansion of the Powershot portfolio takes the well established DyeMansion Print-to-Product workflow to a new level and will be a key driver for the industrialization of Additive Manufacturing. During an interactive and entertaining online event format hosted from their HQ in Munich, DyeMansion will

bring the physical live experience of their new Powershot systems to you as close as possible. In addition to the reveal and a live demo, there will be several deep dive tech talks and statements from partners like Siemens. DyeMansion is looking forward to every participant and will offer the opportunity to book individual “Powershot Live Experience Tours” onsite their locations in Planegg-Munich, Germany and Austin, Texas after the event.

“Join us on March 24 when we will show what we’ve worked on in the last years. The new Powershot Performance series will accelerate the industrialization of Additive Manufacturing and strengthens our position as the partner of choice for factory of the future projects ”, says Felix Ewald, CEO & Co-founder of DyeMansion.

THE NEW POWERSHOT PERFORMANCE SERIES IS **INDUSTRY 4.0 READY**

The new Powershot Performance series will be equipped with state-of-the-art automation technology by Siemens

Like DyeMansion’s vapor polishing system Powerfuse S, the new Powershot Performance series will be equipped with state-of-the-art automation technology

by Siemens. The Powershot Performance series is standing for the next step in the strategic partnership between Siemens and DyeMansion with the goal to industrialize AM.

"During the product development process we have been working closely together with leading service providers and printer manufacturers. We translated their demands into our new systems that are future-proof for the next step in Additive Manufacturing. This will be a key driver to turn the factory of the future concepts into reality," explains Philipp Kramer, CTO & Co-founder of DyeMansion.

More information about the technical details and the availability of the new system will be presented on March 24. If you want to learn more about the new Powershot series, reach out to your DyeMansion contact or your local DyeMansion Sales partner already today.

ABOUT DYEMANSION

DyeMansion is the global leader in Additive Manufacturing finishing systems that turn 3D-printed raw parts into high-value products. From perfect fit eyewear to personalized car interiors, their technology makes 3D-printed products become a part of our everyday life. Starting in 2015 with the first industrial coloring solution for powder bed fusion parts, the Munich-based company extended its portfolio with advanced part cleaning and surfacing solutions for a wider range of 3D-printing technologies in the field of plastics. Today, DyeMansion's Print-to-Product workflow combines industry-leading hardware with the widest range of color options on the market. Their systems are applicable for Industry 4.0 and can be integrated seamlessly into various production processes. The ability to provide a flexible solution for both small batches and high volumes makes DyeMansion a trusted partner for future factories. Through close collaboration with customers across all industries, the 3D-finishing technology and expertise continuously grow with the market. Reduced cost per part, unmatched quality, and high sustainability are core values that drive each innovation of the fast-growing company. In addition to these principles, finding the right finish for every application is what drives them.
